This is a simple snug fit/snap in holder for the Alphasatronics TV/sat remote and a Chromecast4 remote. This TV is used in Frankia motorhomes - probably other places too. Blank back to simplify mounting to wall or under cupboard surface using command-strips to avoid permanent damage to the motorhome. Snug fit yet easy to remove to avoid rattle when driving. Tips for enabling Chromecast on the Alphasatronics TV is to go into the settings and enable all CEC features. That way you only need the Alphasatronics remote for sat-TV and changing source when you are not going to use the Chromecast. And, yes, I know the Alphasatronics is a smart TV, but it is got the WAF of the Chromecast :-)
