Summary

Z-rod lubricator

[3D Printers](#) > [Accessories](#)

Tags: [zrod](#) [lubricator](#) [zrodlubricator](#) [rodsloth](#) [rodcleaner](#)

A 360 degree shield, to help simplify the lubrication of your 8mm Z-rod; while you're using a spray on lubricant.

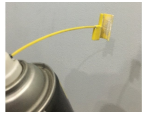

The two parts of the shield slide together, helping to provide excellent coverage and at the same time containing over-spray.

Fits 2.25mm spray tubes.

Simply slip this around your printer's 8mm Z-rod, insert the lubrication nozzle tube and gently spray.

The shield will help to prevent the overspray which typically happens when lubricating your printer's Z-rod.
