Conically sliced (16°) Christmas tree for the Prusa Mini. Download the attached GCode file and directly print it.

The procedure used is described here: <https://www.cnckitchen.com/blog/guide-how-to-use-conical-slicing>

Might also work on different machines if you have enough clearance around your nozzle. Requires 16° nozzle clearance.

**EXPERIMENTAL - USE AT YOUR OWN DISCRETION!**

STLs are for reference only. 3MF file is for SuperSlicer.

Transformed and Back-Transformed using the Conical Slicer developed by the ZHAW Winterthur, Switzerland:
