My wife has a lot of orchids. She uses a certain clip to secure the flower to a stake.

She did not find such clips in the local shop anymore.

Therefor I quickly modelled the clip she needed and printed several ones.

I printed with PETG with 0.1 layer height.

I include the Fusion 360 file so that you can adapt the design to your need.

Update: After I published my design, I found this model: <https://www.printables.com/model/109422-orchid-clip>

Same purpose different design though.
