Summary

Inspired by Steve Robles "HECKLER & KOCH LED LOGO" but for the LED strip not for neon light rope.

Tags: [logo](#) [lamp](#) [led](#) [wallmount](#) [ledlamp](#) [difuser](#)

My intention was to create both a lamp and a neon.

Since the original logo is red, I will probably use RGB tape, but you can also print the lid in color.

I was inspired by the project: <https://www.printables.com/model/311277-heckler-koch-led-logo> but mine is designed from scratch using a logotype.
