This handle for a handmetalscraper follows the basic design of [Clough42's design](#) idea from 2018. It allows additional accessoires like a big endknob etc. via a M6 thread.

The clamping mechanism of the steel-shaft (20x 5 mm, overall length appr. 500mm) is designed for "Rennsteig Carbide Inserts" - e. g.

<https://www.rennsteig.com/produkte/detail/46502500.html> or any other blade with 2mm thickness.
