Summary

I really liked the old school Moto 360 charger stand for the watch. so made something similar.

Simple stand for the charger puck that google give for the watch. Made it similar to the Moto 360 stand and after printing it looks similar to the pixel stand v2. haha

Ended up making a Version 2 to make it look closer to both the moto360 charger and pixel stand 2.

Printer Config:

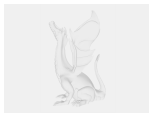

- Supports - Optional
- Rafts - No

Hardware Assembly:

hardware required:

- Tape (Optional)
 - Tape on the bottom to hold the cord in place.
- File
 - Due to printer tolerances, fine tuning may be required.
