Replacement for the broken propulsion holder from the mothership of the Starfares of Catan Boardgame (old version).

This is the original STL-File that comes from Kosmos. They provided in the expansion pack for 5-6 Player two of the original (grey) replacement holder. After asking friendly for the file, they gave it to me.

The File is designed for production with an injection molding machine, so some adjustment might be necessary. I printed it in Prusament PETG Jet Black scaled to 102%.

Credits for this goes out to the employee of Kosmos and the company Kosmos. Thanks!
