### Summary

cybex priam baby stroller umbrella mount

[Household](#) > [Other House Equipment](#)

Tags: [stroller](#) [babystroller](#) [cybex](#) [priam](#)

This mount helps you attach cybex umbrella (with mounting like on the last photo) to cybex priam stroller. Original mount can brakes easily..

This design needs a M6 bolt and nut. Bolt min. length 40mm.

Print do not need supports, I printed with 50% infill but should works with less values.
