### Summary

I created this support to use my 2300gr (30 cm diameter) spools with my 3d printers.

I created this support to use my 2300gr (30 cm diameter) spools with my 3d printers. The spool that I use is from Formfutura but it is compatible with many others. Tested with many Bowden and Direct prints and it works great.

It is assembled with M3 screws and the bearings used are the 608ZZ type.

If you like it and want to offer me a beer I'm happy!

### Print instructions

Infill: **55% Infill**

material: **PLA or PETG**

resolution: **0.20mm**

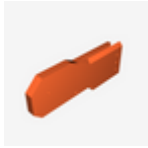

screw size: **M3**

support: **To Bed not for all parts**
