Summary

This is a modified of a simple spool holder originally designed by Danimal_3D.

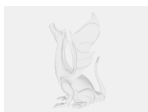

[3D Printers](#) > [3D Printers - Upgrades](#)

This is a remix of a simple spool holder originally designed by Danimal_3D. It is very sturdy and depending on your infill settings can have a bit of heft to it. I made the openings in the base a bit deeper to make sure the rod wouldn't come out as the spool got near the end.
