Just a simple set of risers for the Xbox Series X.

For fear of it getting scuffed, I just designed these real quick to lift it up about

15mm. I printed in TPU but if you use something like PLA, I would suggest gluing foam or something soft to them to keep from leaving marks on the console.

I added a center piece for support, but in my opinion it's not necessary.

Also added a version that is just a single corner foot. Print 4 of them.

### Print Settings

#### Printer:
