Tags: [laptop](#) [cover](#) [webcam](#) [privacy](#) [portatil](#)

My work laptop is a Lenovo T14, and it has the ThinkShutter which is supposed to cover the camera, but for more safety I did this little clip to be sure that the camera is covered.

Maybe it could work with other laptops.

It only uses 1 0,4mm wall, so you can close the laptop with on it.

Printed on PLA with 0,4mm nozzle and 0,2mm layers in less than 3 minutes.
