Summary

This birdhouse is for a small birds. The hole is 28mm.

[Household](#) > [Outdoor & Garden](#)

This birdhouse is for a small birds. The hole is 28mm.

Birdhouse's main body is divided to 6 parts making it very easy to print and each part can be printed within 2 - 5 h using 0.3 layers.

Parts can be glued together or use four 3 mm metal rods in each corner to get a super strong main body.

I suppose this design has been 'approved' as the Eurasian blue tit now nest in it. :)

Print instructions

Use PETG for parts. Infill 15% and 0.3 layer.
