Summary

A wall mount to keep two Dyson accessories close to the charging station. With cable management.

I searched for a handy solution to wall-mount two Dyson accessories close to the charging station and I found [fefo5385](#) and [skyhawkcosplay](#)'s great designs, but for what I had in mind those were not fully satisfying.

So I designed from scratch a wall-mount with **refined interlocking tolerances** and a **built-in cable management** solution to keep the charging cable straight under the charging station. If you don't need the cable management, I've included a version without it. The wall-mount is designed for Dyson V12 Slim, other versions should unfortunately be not compatible.

To install, screw it to the wall (the hole is designed for an M4.5 screw, so I suggest a M6 wall plug).

I suggest at least 3 perimeters for a stronger print.

Some minor cleanup in the “arch” area could be necessary to allow the

accessories to correctly snap.
