Simple model - can be printed both on front and on stand. Model with hearths should be printed on front face.

Images are 85.5x54, visible part of the image is 62x46

Not sure of the Polaroid version - I think instax mini - I got pictures from my sister.

Printed with .28 mm nozzle, no supports. I used RoundTabs in Cura for 4 edges. Brim can be used instead for better layer adhesion.

You can use frame connector to connect multiple frames:
