This is a wide mouth mason jar lid for 12 gauge silver rods used for making colloidal silver.

I used these 9v battery connectors and alligator clips, but you can get away with only using the clips if you prefer.

connectors: https://smile.amazon.com/gp/product/B07T3ZFY3L/ref=ppx_yo_dt_b_asin_title_o02_s00?ie=UTF8&psc=1

alligator clips: https://smile.amazon.com/gp/product/B06XX25HFX/ref=ppx_yo_dt_b_asin_title_o02_s00?ie=UTF8&psc=1

silver rods: https://smile.amazon.com/gp/product/B00QMYYIRM/ref=ppx_yo_dt_b_search_asin_image?ie=UTF8&psc=1

This is designed for the 12 gauge rods. Later, when I have more time I might add a lid for the 10 gauge and for a regular mouth mason jar if people like. Otherwise, as always, I have included the blend file so you can modify it any way you like.

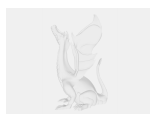

The 12 gauge is only 2.03mm but I found the printer would print this holes

too small. So I had to increase the hole size to 2.4mm. I thought the Prusa MK3 printer was more accurate than this.
