The "Connection Lost" message from RuneScape.

To match the in-game appearance, start with black filament and switch to white when letters begin to print.

Beware of scaling down, because I got poor results slicing with Cura 5.1 on the lettering if the print wasn't large enough. At this size, it will fit on an Ender 3 bed (235x235) when rotated 45 degrees to sit diagonally

Print Time: Approximately 48 minutes

Thanks to [Ken Lew on Printables \(@KenLew_457536\)](#) for sharing his multi-color .3mf file, which I have added.
