Summary

This knob is replacement for Prusa display control knob. Printed in grey looks great.

This knob is replacement for Prusa display control knob. Printed in grey looks great.

Hole for axis is 6.3 mm in diameter if you consider using it for something else.

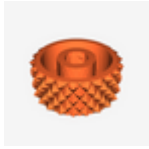

There is also "light" version. Knob body is hollow. Material save is minor, and printing time actually increased a bit, but it looks cool.

This is remix I created from <https://www.thingiverse.com/thing:9095>.

Print instructions

No special settings. Just print hole up.
