Summary

Show off your Coex 3D filament with an extruder shaft spinner!

[3D Printers](#) > [Accessories](#)

Tags: [extrudervisualizer](#) [extruderspinner](#) [coex](#) [coex3d](#)

A spinner for a D-profile extruder shaft with the **Coex 3D** logo. Use it to show off your favorite Coex 3D filament color on your printer!

Print Settings

- Print in model orientation (i.e. on the bottom of the shaft)
- Supports enabled. A support blocker is recommended on the inside of the D-profile hole to avoid having to dig the supports out.
- May have to scale the model up slightly depending on your printer's dimensional accuracy.
