Summary

Tealight holder: Hot air balloon by Yin78 October 25, 2018

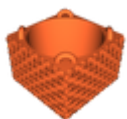

[Toys & Games](#) > [Other Toys & Games](#)

A most wanted hot air balloon, so here you can print one.
Designed in Blender and Tinkercad.

The basket is very useful because it can be used both as a tealight holder (the ones with batteries since the "natural" ones wld cause a crash) and a place where your Lego figures can go for a ride high up in the sky (even Superman needs to rest sometimes).

Theres no need for support. May use raft on the balloon.
