Summary

Enclosure for V400 cut version printable on the V400 or other small printer

[3D Printers](#) > [3D Printers - Upgrades](#)

Enclosure for FLSUN V400. Due to proximity with the bed you need to print this design in ABS or similar.

You will need:

2 polycarbonate panels 403x787x1.5mm (thickness up to 2mm but I used 1.5mm easier to bend)

16 CHC M3x10mm screws

-16 M3 stop nuts

Door at this link :

<https://cults3d.com/fr/mod%C3%A8le-3d/divers/flsun-v400-enclosure-cut-version>

Printing without support, flat face against the bed.
