Hello guys!

As a mobilhome technician, i always carry a multitool in my pocket, so that i can quickly use some pliers to losen some bolts, cut some rubber, or cut/strip some wire.

My SOG powerpint does the trick, but it lacked some good screwdrivers. Soooo i printed this holder for my sabrecut mini ratched with extender and 7 bits.

With my powerpint and this holder in my pocket i spare myself some trips to and from my toolbox.

This version is still a little rough around the edges, but i'm working on a more polished version with a pocket clip (for this i could use some tips 😊)

if you want to print this, i highly recommend to print with PETG and wit 50% infill as this will probably be thrown arround a lot!

Hope you like it and have a great day!
