This is a remix of [Anwilc's KUNA laptop stand smaller with 15mm clearance](#) .

My remix is for the Acer Nitro 5, this laptop needed a little more space between de

cylinders.

The big cylinder has a diameter of 15mm and the small cylinder a diameter of 10mm, between the two cylinders there is a gap of 18mm.

If you want to use this design for another laptop you can! Just measure if the gap wil fit your laptop, if the gap is to big you can stil use it only the laptop is lifted up a bit less.

This print works great if your laptop is overheating!

To print **without any supports** you have to **rotate the stands** in your slicer like on the images
