Dinos are Awesome!

This is a reupload!

The original model by cleven was published more than 8 years ago and is not available on the original source anymore, I wanted to share it here and revived it.

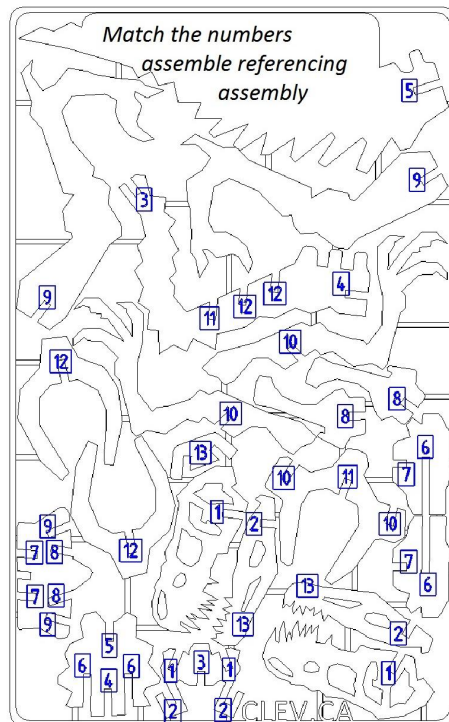

Printing Recommendations:

0.2 mm layer height, of course no supports needed.
It's a quick print!

Assembly Instructions: Please see picture below. Great mini-project for kids too.

Remark: The STL named “fullassembly” is just for assembly reference.

Assembly Instructions. Match the Numbers. As simple like that.

Happy Printing!

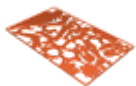

This remix is based on

Velociraptor Business Card
