A more or less screen accurate working model of the War Games DEFCON sign.

More details on the YouTube video, including links to the decals, components and code.

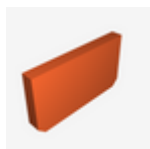

NB check if you have the old or the new version of the trinket. If your Trinket has a micro USB socket, use the model for the base marked "NEW_TRINKET".

Print instructions

Print in 0.2mm matt black PLA for the base and dividers. The base requires support material for its recesses.

The translucent lid should be printed at 0.1mm layer height for smoother diffusion in transparent PETG. The lid is quite thin so handle it delicately.
