I loved [puhlbo's PCP Airgun Moderator / Suppressor](#) but wanted to be able to print with less material and in less time. This answers that.

Seems to work very well on a 6 FT LB air arms S200. I don't have a db tester, but it definitely reduces sound well.

If you print with supports, make sure you have them set to touching build plate only.

Threaded for airgun standard 1/2 UNF as you'd expect.

## Print Settings

**Printer Brand:**

Creality

**Printer:**

Ender 3 Pro

**Rafts:**

Yes

**Supports:**

Yes

**Resolution:**

0.2mm

**Infill:**

20%

**Filament:** eSun PLA+ Black

**Notes:**

Print on its side, use rafts and supports (touching build plate only).

Category: Sport & Outdoors
