Midway Gardens (1914-1929) was a concert venue in Chicago, Illinois designed by Frank Lloyd Wright. This sculpture was a collaboration between Wright and Italian-American sculptor Alfonso Ianelli. This is one of several different “sprites” designed for the project, and the building was adorned with multiple copies made of cast concrete.

The scepter press fits into place. Some support will be needed on the main statue. Building this lying down will keep support off the front surfaces. Consider using adaptive layer heights for best results.
