[alphabetletters](#)

I redesigned some decorated gingerbread stocking cookies based on “Christmas (cookie) ornaments” by Lucafx adding an initial. Mine are printed in Matte Brown PLA with white PLA for the royal icing. Each decoration has a small hole to be able to attach a hook or a thread to attach them to the Christmas tree or a keychain.

I printed mine in two colors by changing the filament at level 20 (nozzle 0.4, layer height 0.12).
