### Summary

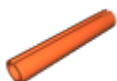

This is a sleeve I made to fix a broken tent pole from my kid's play tent.

Tags: tent

I made this to fix one of the pole on my kid's play tent. It is a tent made for setting up indoors for the kids to play in. I have no idea if it would work for a real tent, but I can't see why not. The poles for this tent are about 7.5mm in diameter and are made of plastic. I printed it vertically with a 10mm brim to help keep it from falling over. I used PLA at .2mm layer height. I affixed it to the pole with copious amounts of hot glue. It doesn't bend as nicely as a non-broken pole, but it still worked well enough to avoid throwing out the tent.
