This is a phone holder and arm I designed to fit a wedge cup holder base designed by MVM2 on thingiverse. It fits a Samsung Galaxy Note 8 with an Otterbox case. He states on his model not to use PLA, but I used PLA and as long as I stuck it on the floor of the truck out of direct sunlight it lasted just fine. I left it in the cup holder once on a hot day and the arm deformed.

Wedge Cup Holder this model mounts to:
