Tags: [ryobi](#) [milwaukee](#) [oscillating](#) [omt](#) [oscillatingmultitool](#)

Got some the of the "on sale" oscillating blades at Home Depot and wanted a good way to store them. Made a couple of different ones for different brands. Got the pin model from <https://3dprints.electronsmyth.com/omt-blade-holders-for-milwaukee-packout-bins/>

Printed better with Prusa then it did with Cura, To keep the pin part stable I would go with 30% infill.

Update 12-1-2022 Added seal file, print @ 100% infill in TPU.
