Tags: [knob](#) [toyota](#) [dimmer](#) [tundra](#) [sequoia](#)

This is a dimmer switch knob for 00-06 Toyota trucks that have a square dimmer switch post. The knob is slightly larger and has a more aggressive knurled edge so it can be easily manipulated with work gloves. If you print knob face down, it will not need supports. NOTE: I designed this to be printed in TPU so it would flex and fit snugly over the post. If you print it in a harder filament, you may need to do some hand fitting and maybe add a screw through the side like you usually see on rheostat and potentiometer knobs. The knob i remixed this from was designed to fit a round, rather than square shaft. It is remixed from a model number 5455272 by knurbine on thingiverse. I couldn't figure out how to add his version here since its not shown in printables.
