Summary

A travel case for contacts case:)

[Household](#) > [Other House Equipment](#)

Tags: [contacts](#) [contactlenses](#) [contactlens](#) [orthok](#)

This case meets following needs of mine.

- Carry on contacts on airflights
- Store a backup in the fridge

... while hydrogen peroxide solution is still making bubbles. You want to avoid

- airtight containers, but also
- leaking solutions.

(Well, there is no guarantee, of course!)

There are 3 variations.

One contact type A (thick lid)

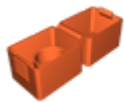

One contact type B (thin lid)

Two contacts type A (thick lid)

Tested with PLA 0.2 mm and 0.3 mm layer height.

I'm sharing Fusion 360 design files too for easier remix. Enjoy!
