Summary

remixed from the Prusa sheet holders, made them 20mm longer

Tags: [holder](#) [sheet](#) [x1](#) [bambu](#) [x1c](#) [p1p](#)

I use the original holders for my MK3S. Needed to make the holders 20mm longer to fit the X1 sheets. So that's all I did, extend the left and right holder and the connector. Works just like the original so you should print the other parts not affected by the extension from the original design.

This remix is based on

Expandable Steel Sheet Holder (MK & MINI)
