A case for a Raspberry Pi 4 driven SeedSigner with room for the Waveshare LCD hat and no visible ribbon cable. The camera is housed in the bottom part.

Only the top part requires **support**. Gcode for Prusa MK3S which worked well for me included. Print gcode you didn't slice yourself at your own risk!

The coverplate and thumbstick are stolen from Revetuzo's great design which you can find here: <https://www.printables.com/model/179924-seedsigner-open-pill-faceplates-digital-cross-joys>

This remix is based on

Raspberry Pi 4 press fit case
