This funnel was created because I was not satisfied with the funnels one could buy here in the stores for kitchen accessoires. All those funnels had long thin outlets with decreasing opening diameters. These long thin outlets are suitable for liquids but for solid material like spices they are pretty bad since it leads to clogging and therefore filling a spice jar takes like forever.

This funnel is designed with the following goals in mind:

- Outlet with large opening (outer diameter: 35 mm), suitable for glass spice jars and spice shaker of "Ostmann" brand
- Inside diameter of outlet is increasing to the end to prevent clogging
- Handle with hook to be able to hang it to a spice rack

The funnel on the picture was printed with the following settings:

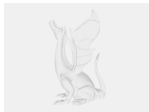

- Filament: PETG clear

- Infill: 15 % Gyroid
- Layer Height : 0.2 mm
- no supports (large opening and handle on the print bed)
