Summary

This light switch cover I made for Hues Dimmer Switch V1 to hide the old non "smart" switches

[Household](#) > [Other House Equipment](#)

Tags: [hue](#) [philipshue](#) [huedimmer](#) [dimmerswitch](#)
[huedimmerswitch](#)

Everyone that has some hue dimmer switches know, that the normal light switches are annoying sometimes, you basically turn off the light completely so it cant be used by the remote anymore or any home automation you have setup.

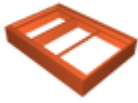

In my apartment the normal light switches are 80x80x18mm in dimension ("German" style switches)

So I used tinkercad to make my own version of it.

It houses the complete baseplate of the dimmerswitch remote and fits super flush on the old lightswitch (no glue or screws needed)

I uploaded my v3 that removes unnecessary parts (but the picture is from v1) (v3 is currently printing) I added the tinkercad link
printed with 0,2 layer height
