Fall season salt/pepper shaker in a shape of a wild mushroom.

I suggest printing hat with 0% infill (will print fine with no supports), and the bottom part with 10% infill to make the whole shaker stable even when empty.

If threads are too tight work on the hat part with sandpaper (or let me know in the comments).

When using it for real please remember to use proper, food-safe filament!

If you like my designs do not hesitate to visit my YT channel :) -
