The mold pieces fit well together but the design could use some tweaking. The excess play doh is challenging to remove, but if you're careful it will work. The dino tracks may work best with simply pressing some play doh into the tracks manually to represent the "ground" around the footprint. The dino model negative is remixed from the outline of <https://www.printables.com/model/66919-diplodocus-long-neck-as-my-child-calls-it/remixes> and the tracks come from an svg of these <https://www.istockphoto.com/vector/dinosaur-footprints-collection-black-silhouette-of-ancient-animal-foot-dinosaur-gm1291664625-386722354>
