Note: not the most attractive thing I've designed, but I tried to do it in a way that it's not really visible (originally I wanted to stick them to the flat outside part).

Hooks that allow you to use your mask over your AirPods Max instead of your ears instead of having to take them off every time

I would recommend printing them vertically with the flat part on the bed. No supports needed. As fine as you can go. Toughest part was cutting the tape to size and sticking them on.
