[napkinring](#)

Thanksgiving Turkey Napkin Ring designed in Tinkercad.

Two versions available - one with feet and one without. I prefer the one with feet so it can double as a table decoration while eating.

I printed mine with 10% infill, random seams and .30mm layers (they print in about 75mins each with these settings). Scale up or down depending on the size of your napkins. I recommend scaling x, y & z proportionally together so the turkey doesn't end up too fat or thin.

I used Atomic Filament True Gold PETG for mine.
