A frog on a stool holding a smartphone linked to the Internet. Many folks are addicted to social media - perhaps we turn into something less than human when that happens.

Updates: Fixed a topology problem with the hat Nov 24, 2022. Fixed the feet of the stool - Jan 22, 2023

It is designed to print without supports - the stool legs act as built-in supports. If you collect or download, please "Like".

The resin print is available for purchase at the following website:
