Intended to mount the Noctua NF-P14r 140mm round fan on top of the Louqe Raw S1 case for improved air flow and heat extraction.

Remove the aluminum top plate of the Louqe Raw S1 case to reveal 4 holes in square pattern that the pins of the fan adapter will snap into. Print two copies to screw to the bottom of a 140mm case fan. Be sure to attach to the intake side of the fan so that when mounted properly the air will be pulled upwards out of the case.

I suggest using an extension cable to connect the fan to the motherboard. This will help with the tight quarters of the case when you have to slide it over the frame or remove it.
