### Summary

A reinforced version of a bag hook for a car seat

[Hobby & Makers](#) > [Organizers](#)

Tags: [hook](#) [bag](#) [car](#) [bagholder](#)

Designed to be hung on the metal poles that hold the headrest. I printed the original for use with a bag (not what it was designed for) and it worked great but it broke right at the top where the layers get small, so I reinforced it.

v3 is better designed for printing, as well as making the loop at the bottom slightly larger.
