Pre-school age friendly cookie cutter - Chonky the Turkey edition

I originally downloaded Thanksgiving Cookie Cutters and printed out the turkey (see photo). It had sharp corners, and was thin and fragile. Since my goal is to give one to each of the children in the preschool that my wife runs, sharp, thin and fragile just wasn't good enough.

Introducing kid friendly cookie cutter. This cutter takes an hour to print. It's sturdy. The edges are all rounded. It fits a child's hand and can be dropped, played with and put in a toy box. No adult supervision required.

Print in PETG - PLA is not dishwasher safe. If you are going to cut real cookies instead of playdough, please read about FDM prints and food safety first. Your call.

No supports required.
