Holder for painting minis with around 25mm base.
Will fit 20mm - 34mm bases, but was designed for 25mm (standard).
Only non-printable part needed to assembly is rubber band.
Printing tips:
Base - upside down to minimize supports needed.
Teeths- longwise (te same orientation as photo, or on its side) , to
maximalize strength in pulling.
I used settings like that (works fine):
10% infill, 3 walls, 3 bottom, 3 top, 0.4mm nozzle, PLA
Licencing: just as shown below, original creation.
