The stepper Motor Connector is from <https://www.thingiverse.com/thing:4140659> but thingiverse didn't let me link it as remix.

The cablechains are cheap ones from ali express. I was fed up with not finding a simple solution so i just made aome connectors myself.

You'll also nee some M3's and <https://www.thingiverse.com/thing:3050607> to connect to the frame of the printer
