Tags: [screwdriver](#) [triangular](#) [meccano](#)

Replacement for Meccano Junior Plastic triangle screwdriver (model A090) for tightening both A051 (J0051) and A054 (J0054) bolts.

Fit is purposely a bit loose to allow you (or your kids) a slight angle while tightening, however there is no slipping due to the triangle shape. Slight knurling on the handle for aesthetics. This is a 2 part model so you can combine your two favorite colours (friction fit or glue with epoxy).

Print settings:

- Prusament PETG (black + orange)
- 3 perimeters for added strength
- Infill: Adaptive Cubic 20%
- Brim (because tall print, easy to get knocked over)

- Handle printed in 1h30 (0.20mm SPEED setting in PrusaSlicer)
- Triangular bit printed in 13 minutes (0.20mm SPEED setting in PrusaSlicer)
