updated 27. 12. 2022 | published 27. 12. 2022

### Summary

tray for 3 beer crates in a row compatible with famous beer crates for batteries and others

---

[Hobby & Makers](#) > [Organizers](#)

---

tray for 3 beer crates in a row compatible with famous beer crates for batteries and others. It should be compatible with the original 3x3 crate tray. I made some holes in the tray to reduce the material usage...

No special print instructions, do as you like...

see my other beer crate mods too: <https://www.printables.com/social/113164-antimaterie/collections/403088>

### additional notes

I'm interested in your feedback to improve my stuff! So give me likes, post makes, comment and rate the print to show others and me how well it goes.

If you post a make, let me know which filament you use.

If you want to support me by donating a coffee go to <https://ko-fi.com/antimaterie> I would really be happy about it. The money will be invested in all stuff regarding 3d printing to give more and better quality models.

In general my Prints are not for commercial use, but if you are a print farm owner and want to sell some of my stuff, please contact me.

Hope you enjoy my models.
